

1. Introduction

Welcome to **Stellar AI**. Your privacy is important to us. This Privacy Policy explains how we collect, use, store, and protect your information when you interact with our AI-powered blockchain ecosystem. By using Stellar AI, you agree to the terms outlined in this policy.

2. Information We Collect

Stellar AI is designed to minimize data collection. However, we may collect the following types of information:

2.1. Automatically Collected Data

- **Blockchain Transactions** – Any interaction with Stellar AI (e.g., sending tokens, AI interactions) is recorded on the blockchain and publicly accessible.
- **Interaction Metadata** – Non-personal metadata such as timestamps and engagement statistics with AI agents may be collected for performance analysis.

2.2. Voluntarily Provided Data

- **User Communications** – If you contact us via support channels, we may collect your email or wallet address for troubleshooting purposes.
- **Governance Participation** – If you vote or submit proposals, your blockchain address may be linked to governance activities.

3. How We Use Your Information

We use collected data strictly to improve Stellar AI's functionality and user experience. Specifically, we use it to:

- Enhance AI agent responses and interactions.
- Monitor and optimize tokenomics (e.g., transaction fees, staking).
- Improve security and detect fraudulent activities.
- Facilitate governance participation and transparency.

4. Data Storage and Security

4.1. On-Chain Data

- Stellar AI operates on a decentralized blockchain, meaning transactions and interactions are publicly recorded and immutable.
- We do **not** have control over blockchain-stored data or the ability to delete transactions once recorded.

4.2. Off-Chain Data Protection

- Any minimal off-chain data (e.g., support emails) is stored securely and never shared with third parties.
- We implement industry-standard encryption and access control mechanisms to prevent unauthorized access.

5. Third-Party Integrations

Stellar AI may integrate with third-party platforms (e.g., X/Twitter, trading platforms). While we do **not** share user data, interactions may be subject to those platforms' privacy policies.

6. User Control & Privacy Rights

You have the right to:

- Use Stellar AI without providing personal data.
- Verify blockchain transactions via public explorers.
- Contact us for off-chain data deletion requests (where applicable).

Since blockchain data is immutable, we **cannot** modify or erase on-chain transactions.

7. Policy Updates

We may update this Privacy Policy to reflect changes in our ecosystem. The latest version will always be available on our official website. Changes take effect immediately upon posting.
